Door

A close-up photograph of a white cabinet door. A silver handle is visible on the left. A red safety lock is attached to the door with two metal brackets. A bright green arrow points from the bottom right towards the lock.

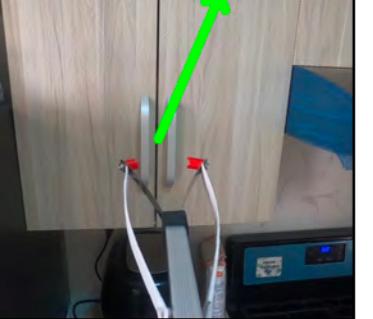

A close-up photograph showing a silver cabinet handle on the left and a blue electronic device with a screen and buttons on the right. A bright green arrow points upwards from the bottom left towards the cabinet handle.

A close-up photograph showing a vertical wooden cabinet door. A metal handle is attached to the left side of the door. Two white zip ties are wrapped around the handle and the adjacent vertical panel of the cabinet. A bright green arrow points from the bottom right towards the zip ties, indicating the direction of the tie-off.

A close-up view of a light-colored wooden cabinet door with a vertical grain pattern. A silver handle is attached to the left side. A bright green arrow points diagonally upwards and to the right from the bottom left towards the top right of the door. The floor below is dark, and a portion of a black electronic device is visible at the bottom right.

A close-up view of a wooden cabinet door with a vertical handle. A green arrow points upwards along the handle, indicating its movement path. Two red clips hold white cables to the handle. The cabinet door is light-colored wood with a vertical grain. A dark panel with a small white label is visible at the bottom right.
